45 Espírito Santo, no período de 8 a 13 de setembro, com oportunidade de encontrar
46 os representantes de outros comitês, autoridades do setor hídrico, de trocar
47 experiências, de reforçar laços de amizade, laços institucionais. Relatou a sua
48 participação em algumas oficinas com temas envolvendo recursos hídricos,
49 saneamento, meio ambiente. Foram apresentados de forma em geral com a
50 participação e grandes trocas de experiências, avaliações do que tá dando certo,
51 e inovações na área de conservação dos recursos hídricos. Salientou ser uma
52 oportunidade ímpar em presenciar todas essas evoluções. Os encontros
53 aconteceram todos os dias pela manhã e tarde com muitas palestras, seminários
54 e oficinas. Relatou a sua participação na oficina desenvolvida pelo IGAM de Minas
55 Gerais, além de uma reunião só com a bancada de Minas, uma oficina para a
56 construção e revisão do plano estadual de recursos hídricos para os próximos 10
57 anos. Pontuou que participou desta oficina com dinâmica de grupos, onde era
58 exigido habilidade, entrosamento para construção do plano de recursos hídricos
59 para os próximos 10 anos, sendo ele escolhido coordenador de um grupo que
60 sagrou campeão de todas as dinâmicas. Por fim, participou da assembleia geral
61 pra eleição do coordenador geral do fórum onde concorriam duas chapas, uma
62 o candidato era do Mato Grosso e a outra chapa Mineira, sendo declarado
63 campeão o mineiro Maurício Charlon, ele já era o coordenador, e foi reeleito
64 como coordenador do fórum nacional para mais uma oportunidade de Minas está
65 na vanguarda participando de forma mais ativa dessas discussões do meio
66 ambiente. O conselheiro concluiu o seu relato e passou a palavra ao presidente.
67 O presidente João Francisco, parabenizou a apresentação do conselheiro William,
68 e questionou sobre a data prevista para a realização do próximo ENCOB, o
69 conselheiro William César informou que a agenda do ENCOB é bienal, sendo
70 previsto o próximo encontro em 2027 em Fortaleza-CE, reforçou que em 2026
71 está previsto o ERCOB que é encontro regional dos comitês do sudeste. **Item**
72 **IV- Apresentação, divulgação da situação de escassez hídrica na**
73 **Estação Fazenda Jambreiro – Grão Mogol/ ofício IGAM 06/2025 (Wesley**
74 **Mota França- IGAM);** O presidente do CBH fez uma inversão de pauta para
75 dinamizar a reunião dando prosseguimento à pauta seguinte, e passou a palavra
76 para o conselheiro Wesley Mota. O conselheiro principiou a sua fala acerca da
77 situação de escassez hídrica que acometeu a estação fazenda Jambreiro no
78 município de Grão Mogol informando que essa situação crítica de escassez
79 superficial na porção à montante da fazenda Jambreiro e sua bacia de contribuição
80 foi definido pela portaria número 16, de 17/06/2025. O IGAM após essa data já
81 editou outra Portaria a 39 de 18/09/2025 ressaltando que as restrições impostas
82 pela situação crítica de escassez hídrica a montante da Estação Jambreiro
83 vigorarão até 20/10/2025. Informou ainda que existe uma a deliberação
84 normativa do conselho estadual de recursos hídricos, n.º 49 e 25/03/2015, e ela
85 estabelece as diretrizes e critérios gerais para definição de situação crítica de
86 escassez, e estado de restrição de uso de recursos hídricos superficiais nas

87 porções hidrográficas do estado de Minas Gerais. Uma nova DN de número 50
88 foi publicada alterando-a principalmente alguns termos utilizados na deliberação
89 número 49. Com base nessas deliberações normativas, e com base no
90 monitoramento pluviométrico, nas atividades de monitoramento
91 hidrometeorológico que são realizadas pela gerência de monitoramento
92 hidrometeorológico e eventos críticos que compõe a diretoria de operações de
93 eventos críticos acompanham a situação dessas estações, e acatam os critérios
94 determinados por essas portarias, como foi o caso aqui dessa estação.
95 Inicialmente foram emitidas duas portarias, a primeira a portaria 16, que declarou
96 a situação crítica de escassez hídrica superficial nessa porção hidrográfica da
97 fazenda Jambeiro, ou seja a partir daquele ponto onde se encontra a situação
98 houve restrições nas captações, e outorgadas, variando em percentuais do
99 volume diário captado, onde os usuários devem cumprir por conta dessa restrição
100 e, por último, a portaria 39 prorrogando o prazo por mais 90 dias, tudo isto está
101 sendo acompanhada pela Gerência de monitoramento hidrometeorológico e
102 eventos críticos e onde eles detectaram a permanência da situação de escassez
103 com a vazão praticamente zero. Informou que ficou estabelecido uma redução
104 de 20% do volume diário outorgado para as captações de água para a finalidade
105 de consumo humano, de acidantação animal ou abastecimento público. Também
106 foi estabelecida a redução de 25% do volume diário outorgado para captações
107 de água para finalidade de irrigação, e a redução de 30% do volume diário para
108 as captações de água para finalidade de consumo industrial e agro-industrial, e
109 de 50% para as demais finalidades, exceto os não consultivos. Informou também
110 que foi solicitado a realização de fiscalizações e vistorias na região para verificar
111 se as recomendações estão sendo seguidas, outro aspecto observado segundo
112 Luiza (analista do IGAM) que tudo indica que essa estação de monitoramento
113 esteja com algum problema na geração dos dados das vazões, sendo assim será
114 realizado uma análise in loco dessa estação para ver se o funcionamento dela
115 está conforme deveria ser, e este é um dos motivos porque não houve uma nova
116 prorrogação do prazo. O conselheiro Wesley finalizou a sua apresentação e
117 passou a palavra para o presidente João Francisco que aproveitou o momento
118 para informar que enquanto membro da defesa civil municipal, recebeu um
119 informativo no dia 12/11/2025 decretando situação de emergência em 126
120 municípios, que participou da elaboração desses relatórios, das discussões para
121 o decreto de seca nesses municípios, salientou que no ponto específico à
122 montante da Estação Jambeiro não chegou a zero, mas bem próximo disso,
123 praticamente não tem água nenhuma. Como ele participa também do
124 PROMANANCIAL um programa da COPASA ele realiza vistorias constantemente
125 na região citada onde se vê apenas um filete de água correndo. **Item V –**
126 **Apresentação da demanda do MPMG/ Diamantina- Solicitação de ações para**
127 **melhoria da qualidade da água na zona rural de MANDASSAIA/LEME DO**
128 **PRADO- Dr. Edvaldo Campos;** O presidente do CBH deu prosseguimento as

129 trabalhos passando a palavra ao conselheiro Edvaldo Campos- RIMA S/A, que
130 iniciou sua apresentação relatando a notificação recebida através do ofício
131 1254/2025 do MPMG de Diamantina expedida pelo promotor de justiça Rauali
132 Kind Mascarenhas, que por meio de denúncias de poluição do rio que abastece
133 a população da zona rural de Mandassaia em Leme do Prado, esta denuncia
134 posteriormente foi transformada em uma ação cível pública/inquérito, que
135 culminou na solicitação encaminhada via ofício ao comitê CBH JQ1 para que este
136 se manifeste informando projetos ou ações para melhoria da qualidade e
137 disponibilidade dos recursos hídricos na sub-bacia do córrego Mandassaia, o
138 conselheiro Edvaldo se pronunciou informando que o CBH JQ1 não havia sido
139 instado sobre essa demanda, e se propôs ir pessoalmente na comarca para
140 maiores esclarecimentos a cerca da demanda, e formalizar um ofício em resposta
141 a demanda apresentada. O presidente João Francisco complementou a
142 apresentação informando que o citado povoado de mandassaia trata-se de
143 reassentamento do Irapé, pessoas que foram reassentados, provavelmente à
144 época em que perderam suas terras, devido ao advento da barragem, talvez
145 sendo esta situação de corresponsabilidade da CEMIG. A conselheira Carla
146 Fernanda de Araújo- SEMAD, solicitou a palavra, informou que apesar de não ter
147 conhecimento sobre todo o conteúdo do inquérito que provavelmente o promotor
148 tenha solicitado informações julgando que o CBH já obtenha recursos financeiro
149 advindos da cobrança pelo uso dos recursos hídricos da bacia, ou investimentos
150 para implementação ou criação de projetos, editais direcionados para essa
151 questão de saneamento, concordou com o presidente sobre a necessidade de se
152 investigar antecipadamente de quem que é a responsabilidade, ou
153 corresponsabilidade, e solicitou o envio do inquérito para se colocar a par da
154 situação, e assim contribuir para busca de soluções. A conselheira Érica Maria
155 requesitou o momento de fala para realizar o relato sobre a sua participação no
156 ENCOB/2025 na cidade de Vitória- ES; e iniciou agradecendo a oportunidade de
157 representar o CBH JQ1 nesse encontro nacional, ressaltou a importância de
158 participar de momentos como esse onde há grandes trocas de experiências, e os
159 conhecimentos adquiridos, descreveu as suas participações nas oficinas de
160 capacitações, em especial que julgou de grande relevância a de auto
161 monitoramento que trata das questões relacionadas aos grandes usuários que
162 captam grandes volumes de água das bacias, também aqueles que lançam
163 efluentes na bacia, ocasionando um grande problema de contaminação, poluição
164 dos mananciais, nascentes, e todo o leito do rio, dentre as dinâmicas sugeridas
165 houve a de criação de projetos como desafio de implantar um sistema de
166 monitoramento, e nomeá-lo, a equipe da qual participei escolheu o nome
167 "INTEGRA ÁGUA", onde a principal abordagem seria a simplificação na
168 plataforma de acesso ao sistema de cadastro e monitoramento da ANA, e a
169 integração entre os entes federados (União, Estado e Municípios), também
170 estender a capacitação aos comitês. Outra capacitação de grande importância foi

171 sobre o desenvolvimento de projetos PSA (Pagamento pelo Serviço Ambiental),
172 visando a sensibilização dos ribeirinhos, moradores próximos as bacias, pequenos
173 produtores rurais, incentivando-os a preservar os mananciais, remunerando
174 financeiramente àqueles que se empenham na conservação das matas nativas,
175 nascentes, revitalizando o meio ambiente local. **Item VI- Leitura, e aprovação**
176 **da Deliberação 006/2025- Aprova o Calendário das reuniões ordinárias**
177 **do CBH JQ1-Exercício 2026;** O presidente iniciou a apresentação da pauta
178 referente a aprovação do calendário com as sugestões de datas para a realização
179 das reuniões plenárias ordinárias do comitê, realizando a leitura do teor da
180 deliberação que também foi exposta em tela compartilhada para visualização de
181 todos, na sequência foi apresentado na tela o calendário com as sugestões de
182 datas, o presidente João Francisco abriu espaço para sugestões/ e ou alterações
183 que os conselheiros julgassem necessárias, foram deliberadas as datas para
184 realização das plenárias: **12/03/2026, 18/06/2026, 20/08/2026,**
185 **12/11/2026. Item VII - Informes gerais;** O conselheiro Edvaldo Campos
186 aproveitou o momento para lembrar ao presidente João
187 Francisco, e aos demais conselheiros que aqueles que queiram pleitear a
188 realização de alguma plenária presencial em sua cidade, poderá fazer estas
189 sugestões com antecedência tanto ao presidente do CBH como a secretaria do
190 comitê, e salientou a importância da realização das plenárias presenciais para
191 maior integração entre os conselheiros, lembrou também o convite para
192 realização de uma plenária na UHE de Irapé pelo gerente Renato Constâncio. O
193 conselheiro Paulo Procópio reiterou o convite para realização de uma plenária
194 presencial no município de Milho Verde; o conselheiro Edvaldo Campos também
195 se prontificou articular uma plenária no município de Bocaiuva. O presidente João
196 Francisco, propôs fazer um chamamento e divulgação pra aqueles que se
197 interessarem na realização das plenárias nessas datas em seus municípios. O
198 conselheiro Paulo Procópio informou que no dia 21 de outubro a Câmara de
199 vereadores de serro aprovou a instituição do dia 05 de abril como o dia em defesa
200 do Rio Jequitinhonha, essa iniciativa já foi encaminhada ao executivo para
201 sancionar a lei. **Item VI – Encerramento;** Após a conclusão das pautas e não
202 havendo mais manifestações ou informes o Presidente CBH JQ1 João Francisco
203 de Pinho agradeceu a presença de todos, e encerrou a reunião. Esta Ata depois
204 de aprovada será assinada por quem de direito nos termos do Regimento Interno.
